Source for calculations: 2009 Census Bureau SIPP report, Table 6, women. * Method for calculations: Since Table 6 reports percentages of women ever divorced out of total women (not married women), we first calculated numbers and percentages for women ever divorced out of ever married, both in total and in each age group. Then (both total and in each age group), we calculated the percentage of those still married once (still married to first spouse/married once), twice (still married to second spouse/married twice) and so on.
